- Associate Degree in Computer Systems Engineering Technology (CSET), May 2019

AWARD

AWS Academy Graduate - AWS Academy Introduction to Cloud Semester 1

PROJECT

Personal Portfolio Website, HTML, CSS, JavaScript, Git ↗
- A hands-on project that highlights the ability to design and develop a functional and visually appealing web application.
- A personalized portfolio that showcases skills and experience in HTML5, CSS, and JavaScript.

Cryptocurrency Price Tracker, Spotify Search Tool, Python, CoinGecko API, Spotify API, Git ↗
- Developed a Discord bot that uses the CoinGecko API to fetch real-time market prices for cryptocurrencies.
- Uses Spotify API to retrieve artist information such as names, followers, pictures, and top tracks.
- Showcases my proficiency in Python programming and API integration.

Crypto Balance Tracker, HTML, Python, Flask, CoinGecko API, Git ↗
- Created and deployed a Flask web application using Python that allows users to input their crypto wallet address and balance.
- The application utilizes real-time API data to calculate and display the total value of their wallet in USD.
